

## Stretch Peplum Top

This is a contemporary and highly embellished **black, fitted top** designed to be both slimming and decorative.

- **Silhouette and Fit:** The garment is a classic **peplum top**, characterized by its tight, body-hugging fit through the bodice and a distinct, gathered flare (peplum) that starts around the natural waistline. The style is sleeveless, and it features a straight or subtle sweetheart neckline.
- **Color and Fabric:** The top is universally black. The material appears to be a **stretch fabric**, likely a heavy knit or ponte material, which allows it to maintain its structure while flattering the figure.
- **Key Embellishment:** The most eye-catching feature is the **heavy, three-dimensional floral appliqué** detail on the shoulder straps. These embellishments are multicolored, featuring gold and possibly white or clear accents, providing a stark, luxurious contrast against the black fabric.
- **Aesthetic:** The top blends a sophisticated, fitted structure with playful, ornate detailing, making it suitable for evening wear or a dressed-up casual look.
